

Bird FAQ's

1. WHAT IS OXYGANIC?

Our products are made from several vitamin precursors of plant and animal origin in a highly concentrated dormant mass of Atrophic, Aerobic, and Facultative micro-organisms which when activated dispense high amounts of dissolved and free oxygen.

2. HOW DOES OXYGANIC WORK?

The products work by a process of direct oxygenation, providing unusually high amounts of oxygen as a by-product of the life forms contained in the water medium. {OUR PRODUCTS DO NOT CONATAIN ANY DYES AND WILL APPEAR COLORLESS OR PALE GREEN.}

3. WHY IS INCREASED OXYGEN BENEFICIAL?

A) Free oxygen aids, restores, and replenishes beneficial bacteria.

B) Beneficial Bacteria {normal aerobic gut flora} require oxygen present in their environment for survival.

c) Infectious micro-organisms {anaerobic bacteria} cannot survive with oxygen present in their environment.

4. WHAT ARE THE BENEFITS OF USING OXYGANIC?

A) Oxygen inhibits the growth of pathogenic bacteria.

B) Oxygen prevents yeast infection.

c) Oxygen allows higher calcium absorption thus creating denser bone structure {helping to prevent metabolic bone disease.} and stronger feathering.

D) Oxygen will improve overall health and cellular metabolism for all ages of birds.

e) Oxygen combines with feed allowing easier permeability into cells and a greater feed-to-weight gain ratio.

5. WHY SHOULD I GIVE OXYGANIC TO MY BIRD EVERYDAY?

To keep your bird healthy and have the peace of mind knowing the Oxyganic is working around the clock to keep harmful bacteria, yeast and fungal growth away from your pet.

6. CAN I EVER USE TOO MUCH OXYGANIC?

No. Oxyganic is not harmful in any way to your pet birds. But you would want to use it as directed so your bottle will last longer as Oxyganic is concentrated for this purpose.

7. WHY SHOULD I SPRAY MY BIRD WITH OXYGANIC?

Oxyganic cleans and brightens feathers, helps eliminate dry skin, bird dander and dust and cuts bird odors efficiently and effectively. It also works on killing any harmful bacteria yeast or fungus that may be lurking on your bird.

8. I CLEAN MY BIRD CAGES WITH PLAIN WATER, WHY SHOULD I USE OXYGANIC TO DO THIS?

Oxyganic cleans debris from cages and kills harmful bacteria all at the same time, there is no need to use harmful disinfectants on your bird's cage if you use Oxyganic.

9. WHAT KINDS OF BIRDS CAN OXYGANIC BE USED ON?

Oxyganic can be used on any and all types of birds from domestic wildlife to exotics. We have Federally Licensed Wildlife rehabilitators that use Oxyganic on the animals they care for.

10. DO I USE OXYGANIC FULL STRENGTH FOR ALL USES?

No. Oxyganic is a concentrate that is meant to be mixed with water. There is a 10 ounce spray that is very handy for someone with just a few birds, when changing water just spray 1-2 sprays in the bird's water dish and it is that easy.

Or follow the dosing instructions for birds and add ¼ tsp of Oxyganic per water dish per bird each day.

Or for multiple bird owners, mixing by the gallon may be easier. Use 4 tablespoons of Oxyganic per gallon of water. Note: mix up preferable the night before or at least an hour or so before watering birds. Just put lid on gallon tightly and turn gallon gently to mix. From this mix the birds can also be spray bathed with this dilution and also cages.

Someone with multiple birds we suggest ordering the Quart size of Oxyganic to start.

11. WHAT IS THE SPRAY BOTTLE CONCENTRATE OXYGANIC USED FOR?

It is handy and convenient to dose the water when you just have one or two birds by spraying into the water dish; also it is very handy if you have an injured bird that needs immediate attention. Just spray a bite or scratch a few sprays on the area, it is that easy. Also itchy skin can cause a bird to accidentally scratch itself causing an infection if not taken care of it can get infected, so the spray can help with stopping this infection before it starts.
