

Cat FAQ's

1. HOW IS OXYGANIC USED?

Oxyganic is intended for use as a topical solution or spray... Spray a light mist of Oxyganic into your cats' drinking water twice daily or when adding or changing water. Re-spray the water every time you fill the water bowl. (And don't throw that old water out! Pour old water on plants for enhanced growth!)

2. CAN OXYGANIC WORK AGAINST CAT SKIN PROBLEMS?

Yes, it eliminates the accumulation of skin oils, and prevents bacteria build-up which causes unpleasant odors. Spray area with Oxyganic as needed. Let air dry.

3. CAN OXYGANIC HELP AGAINST ITCHING PROBLEMS FOR MY CAT?

Yes, for sores, itches, hot spots, or wounds, spray Oxyganic on the affected area twice per day, 2-3 sprays each time, or bathe the animal.

4. CAN OXYGANIC ELIMINATE OR REDUCE UNPLEASANT CAT ODORS?

Even serious odors will be eliminated. Rather than mask or cover up odors, Oxyganic eradicated the bacteria responsible for the odor, thereby eliminating odor at the source. It prevents bacterial buildup which causes unpleasant odors. Spray pet in problem area(s) with 2-3 sprays as often as necessary.

5. CAN I USE OXYGANIC TO BATHE MY CAT?

Yes, shampoo your cat as you normally do. Then, add a small amount of Oxyganic to one gallon of final rinse water. If possible keep cat wet with rinse solution for several minutes.

6. FOR WHAT CAN I USE OXYGANIC?

Oxyganic can be affective in the prevention and/or care against gingivitis, skin problems, hot spots, skin problems, Feline Lower Urinary Tract Disease FLUTD, Infectious Peritonitis, FUS (Feline Urologic Syndrome), feline upper respiratory viruses; Rhinotracheitis and panleukopenia, feline acne, abscesses , allergies ringworm, respiratory infections, fur balls, flesh wounds and urine problems.

7. CAN OXYGANIC BE USED ON CAT WOUNDS?

Yes, simply spray or dab Oxyganic on affected areas twice per day, 2 to 3 sprays each time until the wound is healed. It's easy to use and very effective.

8. ARE THERE ANY CONCERNS ABOUT USING OXYGANIC FOR MY CATS CARE?

Not really, since Oxyganic has no known side effects. However proper storage is required to keep its effectiveness. Do not store Oxyganic in direct sunlight, extreme heat, or in freezing conditions as this may reduce its effectiveness.

9. HOW DOES OXYGANIC WORK AGAINST HARMFUL BACTERIA FOUND IN CATS THAT WEAKEN THE IMMUNE SYSTEM?

Increased natural oxygen delivered by Oxyganic! Direct Oxygenation provides unusually high amounts of natural oxygen. Natural oxygen is produced as a by-product of the microorganisms present in the Oxyganic water medium. Direct oxygenation aids, restores and replenishes beneficial bacteria. Harmful, infectious micro-organisms cannot survive in the highly oxygenated environment created by Oxyganic. Natural oxygen also combines with food, facilitating permeability into cells and better vitamin and mineral absorption.

10. WILL MY CAT HAVE ANY SIDE EFFECTS TO USING OXYGANIC?

No. Not only is it 100% chemical free, but Oxyganic will never become resistant or ineffective. Unlike antibiotics, Oxyganic does not because secondary problems such as normal (good) bacteria reduction or elimination which leaves the door open for yeast and other secondary (pathogenic) infections. Our unique patented product deserves to be widespread in its use. We have a pervasive dilemma in the U.S. involving the increasing resistance of harmful bacteria to antibiotics. These bacteria are survivalists that will do anything to stay alive, mutate, sporulate, etc. Many harmful bacteria have become resistant to antibiotics, and we continue to use stronger antibiotics to eliminate them. Most harmful pathogens are anaerobic (cannot live in the presence of oxygen). Only a small number of harmful pathogens are aerobic, meaning they need oxygen to live. Due to the high amounts of oxygen produced by Oxyganic most pathogens cannot survive while beneficial bacteria need oxygen to live. Oxyganic is a natural alternative in the fight for good health.

11. HOW OFTEN SHOULD I SPRAY A SORE OR WOUND?

For the first three days, spray the affected area three times per day. The wound will heal rapidly. Continue to spray twice per day after that until the wound is completely healed.

12. SHOULD I SHAMPOO MY CAT EVERY TIME BEFORE I USE OXYGANIC?

No. Shampoo only as often as you would normally. Oxyganic works equally well whether your pet is wet or dry. Spray Oxyganic when you detect an odor, whether it's once a month or every other day!

13. HOW DOES OXYGANIC WORK AGAINST HARMFUL BACTERIA FOUND IN CATS THAT

WEAKEN THE IMMUNE SYSTEM? Increased natural oxygen delivered by Oxyganic! Direct Oxygenation provides unusually high amounts of natural oxygen. Natural oxygen is produced as a by-product of the microorganisms present in the Oxyganic water medium. Direct oxygenation aids, restores and replenishes beneficial bacteria. Harmful, infectious micro-organisms cannot survive in the highly oxygenated environment created by Oxyganic. Natural oxygen also combines with food, facilitating permeability into cells and better vitamin and mineral absorption.
