

Daily Use: For reduction in stress related problems, decreases in mortality rate or hatchlings, fledglings, nestlings, prevention and treatment against yeast infections in the crop, reduction in secondary yeast infections due to antibiotic use, stronger feathering with less damage due to confinement and more.

Add ¼ teaspoon of Oxyganic in your birds drinking water daily, or when adding or changing water. It's that easy!

Topical Care: Simply spray Oxyganic on affected area twice per day, 2 to 3 sprays each time until the area is healed.

Cage Cleaning: For the reduction of buildup of pathogens as a result of confinement and reduce the spread of diseases from bird to bird, bird to other pets to humans and vice versa.

Spray cages twice daily and using a paper towel remove debris as needed. Important Note: Unlike other products, birds do not have to be removed when cleaning because Oxyganic is entirely safe and non-toxic for you and your birds.

Addition of new birds: For the reduction of the spread of disease from new birds to existing birds or vice versa, for the reduction of stress related problems due to environment changes. This applies to both quarantine periods and when new birds are finally added to the cage with existing birds.

Spray cages twice daily and using a paper towel remove debris as needed. Important Note: Unlike other products, the birds do not have to be removed when cleaning because Oxyganic is entirely safe and non-toxic for you and your birds.

Follow your normal cleaning procedures but finish up with Oxyganic, spraying over entire surface.

Removal of broken feathers, skin tears and wounds- Clean affected area twice daily, 2 to 3 sprays each time until area is healed.

Bird Baths- Mist surface with spray bottle to cover entire surface at least once daily (3 to 5 mists depending on the size of the bird bath.)

Humming birds- Add 1/4 teaspoon to each new solution.
