

Animal Rescue League of El Paso: Testimonial #1

Mrs. Doubtfire, a female poodle was rescued by ARL from Animal Control after being set on fire. Upon examination, we found most of the body had been burned including her eyes and the nipples were on her stomach. She was pregnant, so her nipples were already swollen and very painful.

Oxyganic was used to clean her wounds and flush her eyes. The normal topical and oral antibiotics were used. As we know, wounds caused by heat take much longer to heal but amazingly Mrs. Doubtfire's wounds showed noticeable improvement in three weeks. Oxyganic has shown that it does have excellent healing capabilities.

A handwritten signature in black ink that reads "Loretta Hyde". The signature is written in a cursive style with a large initial "L" and a long, sweeping underline.
