

Animal Rescue League - Testimonial #2

A Shih Tzu, named Survivor, came to ARL with maggots oozing from its rectum and surrounding area that was raw and infected. After extensive grooming it revealed a large raw skin sore six inches in diameter. We flushed his rectum with Oxyganic and washed his wounds. This treatment was repeated 2 times a day along with Neo Predef powder and oral antibiotics. Because we see a lot of trauma wounds at ARL, we know how impressive Oxyganic is to such wounds. It has increased the healing process in half the time if not sooner. I think Oxyganic has helped this poor dog not be in pain and have a speedy recovery.

A handwritten signature in black ink that reads "Loretta Hyde". The signature is written in a cursive, flowing style.
