Subject: OXYGANIC SUCCESS FOR SOX AND SPICE
To: (deleted)@aol.com Date: Monday, April 6, 2009, 11:07 AM

Hi Cynthia, Thanks again for getting me the gallon of Oxyganic this weekend.

Sox and Spice seem to be doing very well on the Oxyganic since I purchased my first gallon from you in November, 2008. Their teeth and gums look great. Sox has gradually seemed to have less and less problems with barfing hair balls. Since February, 2009, Sox has had no hair ball episodes, so I really think I can thank the Oxyganic for helping to clear up her intestinal tract (I also brush them once and sometimes twice a week). I wanted to also mention that I asked the new Vet about keeping them on the Oxyganic due to their improved gum and teeth health. I informed him of the Oxyganic solution in their drinking water twice a day and sometimes three times a day and he said by all means to keep them on it (saying that oxygenated water would be fine for them) on a long term basis. Sox has also had no scratching or itching episodes for several months, since being on the Oxyganic. She was diagnosed with allergies to many many food and plant items in 2007 and after finding a diet on line that has none of the triggering food content, Sox behaves like a new kitty. But I think that the oxygenated solution in the Oxyganic may have helped her intestinal tract to the extent that she does not absorb so many of the allergy driven triggers (not sure but she sure has improved a lot since 2007).

Anyway Cynthia, I want to keep them on the Oxyganic for their lifetime, if you will be handing that product here in El Paso. The original bottle has one more month on it then I will switch to the new bottle and may last me through rest of this year. I will call you for a new bottle by November or December of 2009. Have a great year to you and to Curtis and to your pets!!
