

These are just portions of the whole testimonial.
The whole testimonial can be obtained upon request to: info@Oxyganic.com

“...If we are able to release 50% of the birds we receive, we are lucky. I can attribute the drastic reduction in mortality rate only to your product. I have changed nothing else.”

“...It takes at least one minute to feed each bird, and when there are more birds than minutes, it is an impossible task. I have never had this problem before and it is a nice problem to have.”

“...In particular I was concerned with the finches because they seem to be the most susceptible birds. I lost eleven finches in the three weeks prior to the use of Oxyganic and had one surviving finch. In the period since using the product, I have only lost one finch and successfully released eight.”

“...I am only more convinced that the finch deaths were caused by pathogenic buildup and the Oxyganic has stopped the growth of pathogens before they reach a lethal level.”

“...When I've had to resort to antibiotic therapy, I have continued to use the product and have noted that I do not have a problem of secondary yeast infection.”

“...I cleaned cages twice a day and sprayed the product without having to remove the birds. The birds appeared to enjoy the misting.”

“...I have noticed as well that all of my birds appear to have stronger feathering {with less damage from confinement} and have better appetites.”

“...Since using your product, I have raised and released five Robins, three Mockingbirds, three Hummingbirds, four Sparrows, Eight Finches, and have an aviary full of White Wing Doves, Mourning Doves, and Pigeons, waiting to be released.”

“...I have incubators with hatchling and nestling Doves, Finches, Kingbirds, Hummingbirds, and Sparrows, that all appear to be healthy and thriving.”

“...I have become so overwhelmed with the sheer numbers of birds that for the past ten days I have had to temporarily stop taking new birds. It is not that I have been receiving more birds than usual, it is that so many more are surviving.”

“...Thank you so very much for allowing me the opportunity to use your product. Your product has allowed me to save a great many birds that certainly would have died otherwise.”

“...I feel confident that with the product I am affording these birds the best chance that they have for survival.”

“...I know that the birds I release are healthy and strong having only been treated with a “natural” product.”

“...Thank you for helping me to help these little birds that cannot help themselves.”
